**Things to do together**

- Add containers of different sizes to your child's bath. Let them experiment with pouring and measuring.
- Cut sponges into different shapes (babies and toddlers) or letters (pre-schoolers) for tub play. Occasionally talk about the shapes and letters.
- How many words can you think of that rhyme with soap? Make a list of these together.
- Sing songs together during bathtime. (The acoustics are usually great in the bathroom)
- Smell the different bath products together. Encourage your child to describe the smells to you.
