Things to do together

- Conduct an orange hunt in your home. Look for anything with the color orange in it. Make a list of all these items. Add other things you can think of that are orange.

- Cut open a pumpkin and clean it out saving the seeds. Roast the seeds for eating or use the seeds for counting and playing with groups of numbers. The more you “play” with numbers, sorting and counting, the more you support beginning math skills.

- Cut out the shape of the letter “P”. Make the “P” sound with your child and then create a list of things you can think of that begin with the letter “P”.

- Visit a pumpkin patch in your area
